

# The Quarterly Journal of Medicine

Edited by P. HUGH-JONES (Senior Editor), P. A. BACON,  
J. S. CAMERON, G. C. COOK, M. J. G. HARRISON, R. HOFFENBERG,  
C. M. OAKLEY, M. D. RAWLINS, A. E. READ, D. J. WEATHERALL,  
F. H. EPSTEIN (American Editor), J. M. HOLT (Executive Editor)

---

New Series, Volume LII, 1983

*Volume LXXVI of the Continuous Series*

CLARENDON PRESS · OXFORD

# Index

---

- Adrenalectomy, total, Cushing's disease treated by: long-term observations of 43 patients, 224
- Alcoholic liver disease in Scotland and Northeastern England: presenting features in 510 patients, 232
- Allergy, and food intolerance, a review, 111
- Alveolitis, cryptogenic fibrosing, associated with peripheral neuropathy, 417
- Calcium metabolism and hyperparathyroidism after renal transplantation, 67
- Cardiovascular features of 11 patients with eosinophilic endomyocardial disease, 23
- Colitis, ulcerative, and persistent liver dysfunction, 503
- Creatine kinase, serum myoglobin, transaminases and lactate hydrogenase, a study on the effects of severe repetitive exercise on, 268
- Cryptogenic fibrosing alveolitis associated with peripheral neuropathy, 417
- Cryptogenic organizing pneumonitis, 382
- Cushing's disease treated by total adrenalectomy: long-term observations of 43 patients, 224
- Diabetes and thyroid disease, familial distribution of: further evidence for aetiological heterogeneity of diabetes mellitus, 244
- Dialysis, continuous ambulatory peritoneal, 3 years' experience, 163
- Dialysis or transplantation, osteomalacia in patients with chronic renal failure before, 332
- Drug associated acute interstitial nephritis: clinical and pathological features and the response to high dose steroid therapy, 194
- Electrocardiographic, and clinical, study of 115 patients with the heart disease of Friedrich's ataxia, with an analysis of serial electrocardiographic changes in 30 cases, 489
- Endocrine abnormalities in idiopathic haemochromatosis, 99
- Endomyocardial disease, eosinophilic, cardiovascular features of 11 patients with, 23
- Eosinophilic endomyocardial disease, cardiovascular features of 11 patients with, 23
- Epileptic subjects, institutionalized, low plasma 25-hydroxyvitamin D and serum calcium levels in: associated risk factors, consequences and response to treatment with Vitamin D, 79
- Exercise, severe repetitive, a study on the effects of on serum myoglobin, creatine kinase, transaminases and lactate dehydrogenase, 268
- Food intolerance and allergy, a review, 111
- Friedrich's ataxia, the heart disease of: a clinical and electrocardiographic study of 115 patients, with an analysis of serial electrocardiographic changes in 30 cases, 489
- Gastrointestinal manifestations of systemic vasculitis, 141
- Glomerular crescent formation, extensive, rapidly progressive glomerulonephritis with, 395
- Glomerulonephritis, apparent idiopathic, lupus-like disease in patients with, and late onset of systemic lupus erythematosus, 471
- Glomerulonephritis, rapidly progressive, with extensive glomerular crescent formation, 395
- Glomerulonephritis, thymoma and myasthenia gravis, 187
- Haemochromatosis, idiopathic, endocrine abnormalities in, 99
- Haemostatic abnormalities in systemic lupus erythematosus, 424
- Heart disease, of Friedrich's ataxia: a clinical and electrocardiographic study of 115 patients, with an analysis of serial electrocardiographic changes in 30 cases, 489
- Hypercalcaemia, familial benign, 120
- Hypereosinophilic syndrome, the clinical features of 15 patients with, 1
- Hyperparathyroidism, and calcium metabolism, after renal transplantation, 67
- Hypertension, severe, improvement of renal function during long-term treatment of with minoxidil, 280
- Hypertension with unilateral chronic pyelonephritis, experience in the management of results of nephrectomy in selected patients, 349
- Immunoglobulin deposition in skeletal muscle in primary muscle disease, 297

- Immunopathological studies of polyarteritis nodosa and Wegener's granulomatosis: a report of 43 patients with 51 renal biopsies, 212
- Infarction, myocardial, extracorporeal perfusions and in shock, a mechanism of tissue damage during, and complement-mediated leucomobilization, a review, 289
- Lactate hydrogenase, serum myoglobin, creatine kinase and transaminases, a study on the effects of severe repetitive exercise on, 268
- Leucoembolization, complement-mediated: a mechanism of tissue damage during extracorporeal perfusions, myocardial infarction and in shock, a review, 289
- Liver disease, alcoholic, in Scotland and Northeastern England: presenting features in 510 patients, 232
- Liver dysfunction, persistent, and ulcerative colitis, 503
- Lupus erythematosus, systemic, haemostatic abnormalities in, 424
- Lupus erythematosus, systemic, late onset of, and lupus-like disease in patients with apparent idiopathic glomerulonephritis, 471
- Lupus nephritis, study of, its classification and the significance of subendothelial deposits, 311
- Minoxidil, improvement of renal function during long-term treatment of severe hypertension with, 280
- Mitral valve prolapse: an assessment of clinical features, associated conditions and prognosis, 150
- Muscle disease, primary, immunoglobulin deposition in skeletal muscle in, 297
- Muscle, skeletal, immunoglobulin deposition in primary muscle disease, 297
- Myasthenia gravis, and glomerulonephritis and thymoma, 187
- Nephrectomy, results of in selected patients: experience in the management of hypertension with unilateral chronic pyelonephritis, 349
- Nephritis, drug associated acute interstitial: clinical and pathological features and the response to high dose steroid therapy, 194
- Neuropathy, peripheral, cryptogenic fibrosing alveolitis associated with, 417
- Osteomalacia in patients with chronic renal failure before dialysis or transplantation, 332
- Perfusions, extracorporeal, myocardial infarction and in shock, a mechanism of tissue damage during, and complement-mediated leucomobilization, a review, 289
- Peritoneal dialysis, continuous ambulatory, 3 years' experience, 165
- Plasma 25-hydroxyvitamin D, and serum calcium, low levels of in institutionalized epileptic subjects: associated risk factors, consequences and response to treatment with Vitamin D, 79
- Pneumonitis, cryptogenic organizing, 382
- Polyarteritis nodosa and Wegener's granulomatosis, immunopathological studies of: a report of 43 patients with 51 renal biopsies, 212
- Porphyria, acute intermittent, early-onset chronic renal failure as a complication of, 92
- Proctosigmoiditis, radiation-induced, the natural history of, an analysis of 88 patients, 40
- Prognostic factors predicting the outcome of sarcoidosis: an analysis of 818 patients, 525
- Prostacyclin, and thromboxane, in disease: a review, 461
- Pyelonephritis, unilateral chronic, experience in the management of hypertension with: results of nephrectomy in selected patients, 349
- Q-fever infection, chronic or fatal, a review of 16 patients seen in North-East Scotland (1967-80), 54
- Radiation-induced proctosigmoiditis, the natural history of, an analysis of 88 patients, 40
- Renal artery stenosis, the decision on surgery in, 363
- Renal biopsies, 51, a report of 43 patients with: immunopathological studies of polyarteritis nodosa and Wegener's granulomatosis, 212
- Renal disease, severe, observations on 18 patients with, and Wegener's granulomatosis, 435
- Renal failure, chronic, osteomalacia in patients with, before dialysis or transplantation, 332
- Renal failure, early-onset, chronic, as a complication of acute intermittent porphyria, 92
- Renal function, improvement of, during long-term treatment of severe hypertension with minoxidil, 280
- Renal transplantation, calcium metabolism and hyperparathyroidism after, 67
- Sarcoidosis, prognostic factors predicting the outcome of, an analysis of 818 patients, 525
- Scotland and Northeastern England, alco-

- holic liver disease in: presenting features in 510 patients, 232
- Scotland, North-East, a review of 16 patients with chronic or fatal Q-fever infection seen in, (1967-80), 54
- Serum calcium, plasma 25-hydroxyvitamin D, low levels of in institutionalized epileptic subjects: associated risk factors, consequences and response to treatment with Vitamin D, 79
- Serum myoglobin, creatine kinase, transaminases, and lactate dehydrogenase, a study on the effects of severe repetitive exercise
- Shock, extracorporeal perfusions and myocardial infarction, a mechanism of tissue damage during, and complement-mediated leucomobilization, a review, 289
- Stenosis, renal artery, decision on surgery in, 363
- Steroid therapy, high dose, response to in drug associated acute interstitial nephritis, 194
- Stroke, acute, syndrome, clinical diagnosis of, 515
- Subendothelial deposits, significance of, in a study of lupus nephritis and its classification, 311
- Thromboxane and prostacyclin in disease: a review, 461
- Thymoma, and glomerulonephritis, and myasthenia gravis, 187
- Thyroid disease and diabetes, familial distribution of: further evidence for aetiological heterogeneity of diabetes mellitus, 244
- Transaminases, serum myoglobin, creatine kinase and lactate hydrogenase, a study on the effects of severe repetitive exercise on, 268
- Vasculitis, systemic, gastrointestinal manifestations of, 141
- Vitamin D, associated risk factors, consequences and response to treatment with; and low plasma 25-hydroxyvitamin D and serum calcium levels in institutionalized epileptic subjects, 79
- Wegener's granulomatosis and polyarteritis nodosa, immunopathological studies of: a report of 43 patients with 51 renal biopsies, 212
- Wegener's granulomatosis: observations on 18 patients with severe renal disease, 435
- Zollinger-Ellison syndrome, changing concepts in the presentation, diagnosis and management of, 256
